FAQs for Incoming students

Helpful information for your Learning agreement and your first weeks at TUM School of Medicine

Important to know regarding your Learning agreement:

- check the general structure of the 3 clinical study-years (available at our mediTUM homepage → “Stundenpläne”)
- every year is divided into two cohorts (“Zug A” and “Zug B”)
- you can’t choose obligate courses from different cohorts or study-years that take place at the same period (e.g. seminar dermatology and seminar gynecology)

Special features of the curriculum at TUM School of Medicine:

Interdisciplinary lectures 2.1 and 2.2 contain Internal Medicine, Surgery and Pathology **and so does the exam**

So if you choose Internal Medicine and want to participate in the exam of 2.1 or 2.2, you have to attend the whole exam including surgery and specific pathology. **There is no** separate part

Attending **fulltime internship courses (“Blockpraktika”)** is possible with **following reservations:**

- in case you stay only 1 term **and** choose exams of the first two years it is **not** possible to choose Blockpraktika since the examination period is completely in timeconflict with the “Blockpraktika”
- If you stay 2 terms you can participate in the “Blockpraktika” (how many depends on the exams you will have to attend in the 2nd term)

Incoming students can **not** attend the following subject:

**Clinical Chemistry,
Laboratory Medicine
(Klinische Chemie)**

Requirement for attending the one-week-fulltime-internship pediatrics (“Blockpraktikum Pädiatrie”):

Proof of two-times - vaccination OR proof of Measles Titer >200 mIU/ml (pos. Titer) – irrespective of the date of birth

Please understand that you will **not** receive your schedule and cannot start studying at TUM, before we have received these 3 documents:

1. Copy of the matriculation document of your home university
2. Medical certificate
3. Certificate of Malpractice Insurance (= professional indemnity insurance)

These documents have to be sent by e-mail to international.mec.med@tum.de, **no later than 6 weeks before the start of term**

Transcript of records

After your stay you will receive a transcript of records. Please understand that we can’t offer any other or additional documents. Please keep your “Laufzettel” and take them home in case your university needs them for recognizing your performances at TUM
