Course description

Part 1

General information about the course		
1 Major of study Nursing	2. Study level: 2nd degree	
1. Major of study: Nursing	3. Form of study: intramural	
4. Year: 2nd- 2022/2024	5. Semester: III, IV	
6. Course name: Specialist Palliative Ca	are	

7. Course status: required

8. Course contents and assigned learning outcomes

Shaping the skills of planning and conducting the specialist palliative care of patients with advanced, progressive and non-curable chronic diseases and of co-operation within therapeutic team.

Shaping the skills of recognizing and diagnosing of psychophysical patients' with advanced chronic diseases condition and of supporting the patients and their families.

Preparing for thorough chronic pain treatment assessment and monitoring along with skills of proper administering the drugs for pain and other symptoms treatment, and proper fill of prescriptions based on actual legal provisions.

Learning outcomes / reference to learning outcomes indicated in the standards

For knowledge – student knows and understands: ... B.W1-4., B.W12., B.W44., B.W48.....

For skills student can do:... B.U1-3., B.U11-12., B.U16., B.U18-20., B.U39., B.U45-49.....

For social competencies student is ready to: Point 1.3 of general learning outcoms......

9. Number of hours for the course			40
10. Number of ECTS points for the course			3
11. Methods of verification and evaluation of learning outcomes			
Learning outcomes	Methods of verification	Methods of evaluation*	
Knowledge	Written evaluation – open questions Grade credit – MCQ	*	

L	earning outcomes	Methods of verification	Methods of evaluation*
	Knowledge	Written evaluation – open questions	*
	Knowledge	Grade credit – MCQ	
		Report	
	Skills	Observation	*
		Practical exam	
	Competencies	Observation	*

^{*} The following evaluation system has been assumed:

Very good (5,0) – the assumed learning outcomes have been achieved and significantly exceed the required level

Better than good (4,5) – the assumed learning outcomes have been achieved and slightly exceed the required level

Good (4,0) – the assumed learning outcomes have been achieved at the required level **Better than satisfactory (3,5)** – the assumed learning outcomes have been achieved at the average required level

Satisfactory (3,0) – the assumed learning outcomes have been achieved at the minimum required level

Unstatisfactory (2,0) – the assumed learning outcomes have not been achieved

C_S015	Student is able to use the standarised tools for assessment of patient's nutritional status;	B.U49.
C_S014	Student is able to educate the patient in the field of selfcontrol and selfcare in the pain treatment;	B.U48.
C_S013	Student is able to monitor the effectiveness of analgesic treatment;	B.U47.
C_S012	Student is able to choose and implement the non-pharmacological and pharmacological methods of analgesic treatment according to patient's clinical condition;	B.U46.
C_S011	Student is able to assess the pain intensity using the specific scales according to patient's age and clinical condition;	B.U45.
C_S010	Student is able to diagnose the psychological patient's condition and his reactions on disease and treatment process and to motivational-educational support him;	B.U39.
C_S09	Student is able to prepare the health needs diagnosis and to plan care and treatment organisation on the institutional and interinstitutional levels;	B.U20.
C_S08	Student is able to coordinate the implementation of health services for patients with chronic diseases;	B.U19.
C_S07	Student is able to implement the therapeutic actions due to patient'c clinical condition assessment within the framework of professional qualifications	B.U18.
C_S06	Student is able to choose and apply methods of patient's health condition assessment during providing nursing services;	B.U16.
C_S05	Student is able to assess the patient's adjustment to the chronic disease;	B.U12.
C_S04	Student is able to diagnose the specific health threads for patients with chronic disease;	B.U11.
C_S03	Student is able to administer the drugs and other medical substances and to fill in a prescription notes;	B.U3.
C_S02	Student is able to interprete the drugs pharmaceutical characteristics;	B.U2.

20. Forms and topics of classes	Number
	of hours
21.1. Lectures	20
The needs of patient in the end of life- works for patient and his family. Influence of chronic	
disease on psychophysic function of patient, his relationship with family and carers. Predictors	
of patient's with advanced, chronic, progresing and non-curable disease functioning.	
Patient's with chronic, progressive and advanced disease health hazards in the field of psychic,	
spiritual and social needs. Recognition of patient's psychological situation and his reactions on	
disease, treatment proces and forms of suport. Assesssment of patient's adjustment to	
chronic, non-curative disease. Assessment methods of patient's biopsychic condition in terms	

of palliative care patients'needs and expectations. Forms of support in the bereavment period. Prophylaxis of burn-out syndrom. Methods of coping with the stress. Use of relaxation and visualisation technics in end-of-life patients. Threats and health needs of patient's with chronic, progressive and advanced disease in terms of physical needs and methods of care and treatment due to patient's condition assessment within aquired professional qualifications. Work in the therapeutic team. Forms of interinstitutional help. Nurse participation in the symptomatic treatment of palliative care patients with use of drugs containing specific active substances, based on the direct evaluation of patient's general condition. Law regulations concerning reimbursement of drugs and other medical products used in end-of-life patients. Mechanisms of action and metabolism of drugs used for treating the patients with advanced non-curative disease. Rules of administering the drugs with specific active substances in palliative care patients, including preparing the prescriptions. Symptoms and adverse effects of used in palliative care drugs. Interpretation of drugs used in palliative care characteristics. Pharmacological and non-pharmacological methods of analgesic treatment. Monitoring of analgesic treatment's effectiveness. Educational forms used for patient's self-control in analgesic treatment. Use of the standarised tools for assessment of patient's nutritional status. 22.2. Practical classess 23. Recognition of patient's with advanced non-curative disease needs. Diagnosing and implementing of different treatment methods and therapeutic care of patient's nutritional status. 24. Recompany of the palliative care patients in the field of their physical, psychic, spiritual and social needs and expectations. Supporting the family and other carers. Nurse participation in the symptomatic treatment of p		
Visualisation technics in end-of-life patients.
